Brainstorm & Idea prioritization

Date	
Term ID	SWTID-2026-6582
Project Name	Smart Library Request workflow in Servicenow
Maximum Mark	4Marks

Brainstorm & Idea Prioritization:

Manual library request processes (book issue, return, approval, tracking) are time-consuming, error-prone, and lack transparency. There is a need to automate and streamline the workflow using ServiceNow to improve efficiency, tracking, and user satisfaction.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Step-2: Brainstorm Idea Listing and Grouping

Smart Library Request Workflow in ServiceNow

1. Brainstorm (Idea Generation)

All possible ideas - No filtering

- Book request (new books)
- Issue / Return books
- Digital library access
- Approval workflow (iibrarian)
- Notifications (email/SMS)
- Due date reminders
- Fine calculation
- Student login portal
- Search catalog
- Reserve books
- Admin dashboard
- Reports & analytics
- Integration with database
- Barcode/QR scanning
- Mobile access

2. Idea Listing (Structured List)

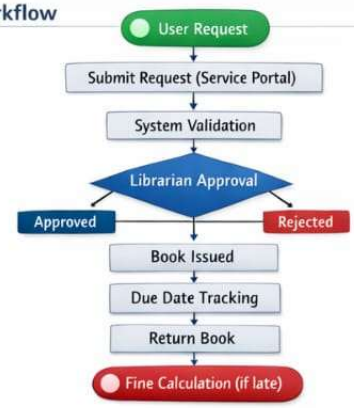
User Features	System Features	Admin Features
- Request Book	- Auto Notifications	- Approve/Reject Request
- Search Books	- Due Date Tracking	- Manage Inventory
- Reserve Books	- Fine Calculation	- Generate Reports
- View Status	- Workflow Automation	- User Management

3. Grouping (Categorization)

Smart Library Request Workflow

User Module	System Module	Admin Module
- Request Book	- Notifications	- Approvals
- Search Catalog	- Due Tracking	- Inventory Mgmt
- Reserve Book	- Fine Calculation	- Reports
- View Status	- Workflow Engine	- User Control

ServiceNow Workflow



Step -3: Ideal Prioritization

Ideal Prioritization for Smart Library Request Workflow in ServiceNow

High Priority (Essential) | Medium Priority (Important) | Low Priority

High Priority (Essential)

- Request Book
- Search Catalog
- Librarian Approval
- Notifications (email/SMS)
- Due Date Tracking
- Student Login Portal

- Core features that are critical for the basic functionality of the library request system.
- Important features that enhance the system's effectiveness and usability.

Medium Priority (Important)

- Reserve Books
- Fine Calculation
- Inventory Management
- Reports & Analytics

- Important features that enhance the system's effectiveness and usability.

Low Priority (Nice-to-Have)

- Digital Library Access
- Mobile Access
- Barcode/QR Scanning
- Database Integration

- Additional features that are beneficial but not essential for initial implementation.

Notes

- Priorities **should align** with user needs and system goals.
- Start with **high priority**, move to medium, then low as resources **callow**.
